CUSTOM

We create custom sizes and offer custom Australian Dulux colours for commercial customers who require custom options.

QUALITY

We are involved in the Actual Design of each pot and pride ourselves on Quality Assurance to deliver you consistent Top Quality durability.

EXPERIENCE

With over 25 years experience leading the industry we have the answers you need to get the job done right and protect your investment.

BEST PRICES

We have the Best Priced Pots in Australia and by cutting out the middleman we pass on all the savings to you. So Call Us and Order Today.

Advantages of Custom Spray

COMMERCIAL GRADE FINISH

Strongly recommended for Australian conditions
after 25 years in business.

5 REASONS WHY CUSTOM SPRAY IS THE BEST FINISH

1. **Your choice of great colours**, like our best-selling charcoal, Dulux White-on-White, or Colorbond Monument. We can do any colour in the Dulux or Colorbond ranges, as well as most other ranges. Matching to a project or existing installation is easy.
2. **Colours are consistent and won't fade over time, unlike most infused colours and inferior paints**. We use Australian Dulux Weathershield, giving our custom spray Dulux's 15-year guarantee against blistering, peeling, or flaking. Weathershield is also renowned for its durability and colour quality.
3. **Easy cleaning**, despite harsh Australian conditions leading to dust and grime build-up. Weathershield can be easily cleaned with soap and water.
4. **Repair is easy too**, should your pots be damaged. Most will never need it, but if something does somehow manage to damage your pot, some builders' bog and a lick of Weathershield and your pot will be good as new.
5. **Watering needs are reduced**, as the paint seals the pot surface against evaporation.

Helps Prevent These Aesthetic Effects

Helps prevent efflorescence, the white leaching bloom that appears on wet masonry and ceramics as water dissolves salts and minerals from fertiliser and concrete products and carries them through to the surface.

Helps prevent crazing, the fine web of tiny, shallow cracks that can form on ceramics, concrete, mud, and even wood.

Conceals the non-structural cracking that will occur in all concrete-based products due to shrinkage and expansion.

Cannot be washed out or leached away, unlike factory infused colours.

Always plant in accordance with our planting guide.

Custom Shapes & Sizes

- Available in our StoneLite and GRC ranges
- Can be made to your specifications
- With our StoneLite range we have the shortest lead-time in the Australian industry

Custom Dulux® Colours

- Available in our StoneLite, GRC, and Lightweight Terrazzo ranges
- We use Australian Dulux WeatherShield in the colour of your choice
- Robust, durable finish, guaranteed by Dulux for 15 years against fading or peeling
- Easy to clean
- Easy to repair after vandalism
- Colour-match to your project

We recommend low-voltage pumps.

A 24V shock hurts, but a 240V shock can kill.

240V is mains power.

Technically 24V can kill too, but it's *much* less likely.

It's not as hard as you might think for children or animals to get to cables, and sometimes the water feature might become electrified.

Planting Guide

Pots need good drainage. Water trapped in the pot can cause cosmetic damage or even structural failure. It will also drown your plants.

DO	DON'T
Do choose plants that are suitable to growing in pots.	Don't choose plants with invasive root systems. Some plants can break any pot.
Do use a good quality premium potting mix. Potting mix is designed to drain freely, unlike soil or planting mix.	Don't use soil. Soil compacts and hardens, preventing water from draining. Don't mix soil into potting mix to make it go further.
Do fill the bottom of the pot with a 50 mm layer of 10 mm blue metal (a type of gravel). This will allow free drainage while preventing potting mix from blocking up the fly screen.	Don't put foam or styrofoam in the pot to make the planted pot lighter. The foam will compact and block. Don't use sand to help drainage. The sand will compact, preventing water from draining freely.
Do cover the drainage holes with a single layer of fibreglass flyscreen. Do make sure the holes in the flyscreen are at least 1.5 mm wide. Do make sure the flyscreen covers enough of the pot base to stay in place when blue metal is added.	Don't use flyscreen with tiny holes. It will clog up. Don't use multiple layers. They will clog. Don't use metal flyscreen. It will corrode and break. Don't use geofabric. Geofabric retains water, preventing drainage. Shadecloth, silt fence, and weed mat will all clog and prevent drainage too. Only use flyscreen.
Do seal the inside surface with bitumen sealer. This prevents cosmetic damage from water soaking through the pot walls.	Don't try to line the pot with corflute or plywood; it won't work.
Do make sure the pot has clear, open, unblocked drainage holes.	Don't block or seal the drainage holes.
Do raise the pot on feet so that water can flow freely away from the drainage holes.	Don't set the base of the pot directly on the ground or floor. This encourages silt to block the drainage holes.

These requirements and prohibitions are based on many years of first-hand experience in the modern pot industry and many centuries of collective wisdom growing plants in pots. In the end they're all about letting water escape the pot. For further information, please see our online planting guide at <https://www.potswholesaledirect.com.au/pot-care-guide/> or our terms and conditions at <https://www.potswholesaledirect.com.au/terms-and-conditions/>.
